

Ex. 1

Ex. 2

**1. Label sections “A” and “B”.
Cross the “A” section over
the “B” section and glue
or staple.**

**2. Once section “A” and
“B” have been attached,
you will need to fold the
back “scalloped ” edge up.
This will give you a
place to attach the rear
feathers.**

Ex. 1

Ex. 2

**3. Trim a relatively
straight line across
the bottom of the unfolded
plate then attach to the
folded back end of the body.**

**4. Adjust the tail feathers by bending the
attached area so it will stand. Add the wattle,
beak, and eyes. Enjoy!**
