

PROJECT CRITERIA:

Students will create a 10" or 14" diameter mandala using red clay body, hand-building techniques, and symmetry.

PROJECT INSTRUCTIONS:

- Students will create a 14" diameter circle using the slab roller and pin tool.
 - Due to the large nature of this piece, the slab needs to be at least $\frac{1}{4}$ inch thick and very consistent – no tears and creases.
- Once students have their slab circle created, they will use a ruler and lightly mark lines to ensure symmetry in their design.
- Following their guidelines, students will begin constructing their Mandala design using coils, slab forms, miniature spheres, stamps, etc.
- Students will slowly build their design making sure to slip, score, and mend all attached pieces extremely well!
- When the entire Mandala has been constructed student will place their clay work on the drying rack for bisque fire.

CERAMIC MANDALA
